

mDECK Densu io

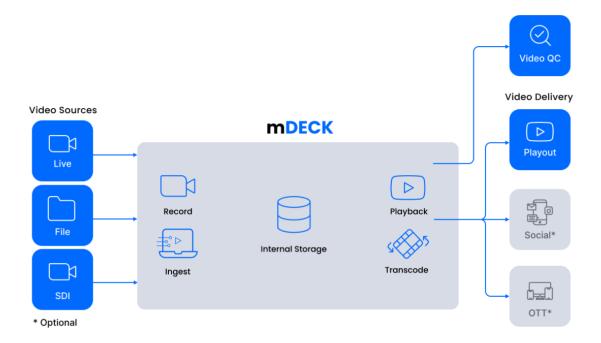

Overview

Optimize your media production and distribution workflows with mDECK Densu io, a professional dual-node media deck that can combine operations of record, ingest, transcode, and playback content in FHD, and NDI in a single box.

This compact and cost-effective media deck not only performs hybrid workflows (file-based and live) but also supports the most used formats on the market and allows users to work together as a group.

Additionally, it has the option for local storage of 6 or 12TB and can be pre-configured to support IP Live workflows. This powerful media deck comes with PSU redundancy, and an OS Drive.

Highlights

- mPAM Content and production asset manager for up to 2 users
- mSWITCH Remote live switching and composing
- mTALK Audio communication between users
- Live to live multiple simultaneous records
- Batch capture
- Multiple simultaneous transcodes
- · Automated file ingest
- · Metadata preservation, enhancement, and enrichment
- File playback multiple simultaneous plays
- Playlist management

- Quality control, audio, and video report
- Flexible file naming and renaming engine
- Locators support
- Closed captions
- Media checksum
- Supports spanned clips
- Proxy generation
- Playout preparation and control
- Improved security
- Artificial intelligence

Specially Designed For

- Educational/Government
- Live Entertainment/Worship
- Corporate
- Sports
- Film/TV Studio/Scripted
- Digital News

- Mobile Studios/OB Vans
- Digitalization
- Archiving
- Post-Production
- Television/Broadcasting
- OTT & Streaming

mDECK

Features

Timecode support

LTC (SMPTE 12M)

VITC (SMPTE RP188)

Time of Day

From VTR (BVW) - Serial

Multiple LIVE and simultaneous records

Crash Record operations

Gang Capture operations

Independent workflow selection in Gang Captures

Unique workflow for gang captures while using clipnaming with counters

Hide unused Capture Instances

Synchronized gang captures

Ability to choose which channels are present in the gang

Frame Chase editing

Unlimited capture duration support

Loop record support

Extend playlist maximum duration in Loop Record workflows

Perform Loop record captures trough automatic jobs

Growing files support

Growing file support for Grass valley Edius Workgroup v.9 and \boldsymbol{X}

Growing XDCAM MXF OP1a file support on Avid Media Composer *required Nablet AMA Plugin

Features

Automatic Stream Control - Detect input streams and start recording automatically

Continuous recording support

Continuous live stream capture

Recording timer for captures

Abort or force stop a capture or a stream

Frame rate conversion option on Capture workflows

Generation of MP4 files as fragmented MP4 with DCP packager

Generate XML sidecars with WAV file as output while recording

Perform "Run after completion" scripts

Live Probing option

Stream Closed Captions

Edit a Workflow directly from the Player

Option to start timecode recording from 00:00:00:00

Export MOG playlist (.XML Sidecar containing information about the chunks of the recorded media)

Batch record support

Deck control through Serial Ports

Pre-roll and post-roll options

LiveU NewsML batch capture

LiveU NewsML metadata import

LiveU NewsML - support XML from devices (Live U, Android and iPhone)

LiveU include subfolder browse

Contribution Web Video Player - Aspect marker, Safe Area Marker, and Center marker

Player Overlay - Center Dot and Cross

Support for Active Format Description (AFD)

Operation modes

Automatic

Manual

Scheduled

Clipnaming

Flexible file renaming engine

Create multiple and diverse Clipnaming templates

Clipnaming based under metadata profiles

Use of common labels (Id, label, Counter, Date, Original Source Name, Weekday, User)

Field numeric representation of the day of the week

Folder Structure creation

Drag and Drop support

Restore auto numbering on capture abort in naming templates

Time Zone Support when the "CreationDate" field is selected

Support to append "_p" to proxy clip names

Multi-Configuration metadata management and enrichment

Internal asset management

Quickly search for assets metadata

Metadata management

Metadata generation on capture operations

Metadata fields - prevent overwrite

Protection of metadata fields

Delete custom metadata Edit group clip metadata

Edit source metadata based on a metadata profile

"Description" field editable in metadata widget

"Description" field as a column in the asset explorer list view

Send metadata to Gang Captures

Favorite metadata fields

Create custom metadata fields

Rating metadata field

Metadata source update directly in the metadata widget

Add asset tags insertion in preset list

Support re-using lists of possible values

Update Metadata in Media Central/Interplay using AMT-3 library

Ability to rename media in Interplay after capture began

Take field (counter)

Support for "Reel" metadata field using Apple ProRes Wrapper

Read metadata from cloud storage (Amazon S3 / Google Cloud Storage / Tencent / IBM Cloud Object Storage)

Preserve Arri specific fields

Preserve RED digital cinema color information

Find immediately and learn everything about any asset

Asset Browser - Show/hide proxies

Asset Browser - Sort, order, and search

Asset Explorer - Resizable thumbnails

Asset Explorer - Support asset availability

Asset Explorer - Search all

Asset Explorer - Extraction of thumbnails and posters while indexing

Asset Explorer - Playable thumbnails

Asset Explorer - Pop-up player

Asset Explorer - View the exact duration of files with more than 24 hours

Asset Selection -View the total duration of the selected assets

Asset Selection - Configurable asset preview duration

Asset Selection - Add Numeric Input

Asset management Check-in

AVID AAF

AVID interplay

XML support

XSLT transformation - XML sidecar

Edit share flow

Vizzi OTT check in

Audio support

Input and output PCM support

Input support for Dolby E-AC-3, Dolby TrueHD, and DTS

Input and output Dolby-E support

DTS Coherent Acoustics (DCA)

Support PCM 96KHz

Independent audio encoder for hires and proxy

Individual audio mapping by output target

Record audio only streams

Playout audio only streams

Loudness normalization (EBU R128)

Audio downmixing & upmixing

External audio files support (.WAV)

MPEG-4 Audio (M4A) audio format as output

Mute proxy option in output

Close captions

CEA/EIA - 608

Scenarist (SCC)

Add sidecar - SubRip (SRT)

Add sidecar - Fragmented WebVTT

Add sidecar - ISMT/CMFT subtitles

DCP subtitle burn-in (.SCC)

Digital Cinema Package (DCP) open captioning

Support DVB-S captions in streams

Support captioning for OTT (CMFT, SubRip, and WebVTT)

Stream Closed Captions

Locators

Create locators with shortcut keys

Edit and delete locators

Edit locators description

Insertion and viewing

Action fields creation and customization

Comments insertion in a markers widget tab

Locators source in markers widget

Multiple subcategories for a locator

Order asset locators by timecode

Absolute timecode for source locators

Enter Timecode without the need of entering colons

Eject locators using the player eject button

Locators merge

Support for locators with AMT captures

Send locators to gang captures

Send locators to playout

Preserve Metadata Enhancement locators created by an Automatic Job

Scheduler (Calendar View)

Scheduled Record

Scheduled Automatic Jobs via Scheduler

Edit individual events

Allow editing of settings for each occurrence/repetition

Configure the number of events repetitions

Check collision between events with repetitions

Placeholder when editing an occurrence name

Enable field event name as AVID Interplay clipname by default

Pre-set naming templates

Independent targets and multiple outputs support

Capability to set a maximum capture duration

Configurable number of iterations when using maximum capture duration

Use AVID Interplay clip name as event name on crash record events

Pre-roll and post-roll options for scheduled events

Define events to be triggered on any day, on working days only or only on weekends

Possibility to use the calendar notion option in order to adjust for daylight saving time automatically

Ability to edit Start Time field after the first recording

Visualize scheduled events in a List View

Export activity events

Perform captures from a MOG S1000

Perform captures from an Airspeed 5000

Perform captures from a Softron Movie Recorder

Scheduler (Playout Grid View) - Unifies in a single rollout view all Playout activities - Optional

Grid View for Playout

Crash Playout directly from the Grid View

Loop a playlist

Schedule Clip Lists to be Played out

Time zone Support

Ability to set a pre-determined number of repetitions

Trigger Playout events (Any day, On Working Days or only on Weekends)

Signal error detection and related recovery actions

Signal error detection

Drop frame detection

Timecode breaks support

Configurable capture resume methodology

Automatic streaming (headless) - Restart capture after stopping/crashing or rebooting

Checksum media

MD5 hash file

MDL - Media hash list

Live to Live

Delete artifacts on abort

Vizzi OTT Live Output

Multiple resolutions check-in

Support Time of Day in input streams (RTMP, MPEG-TS, RTP, SRT, RTSP, HLS, LLDASH, MSS, MPEG-DASH, CMAF)

Support Live Stream from sCapture as rPlayout input

Variable Frame Rate Input

Support IGMPv3 multicast

MPEG-TS Support

Capture of MPEG-Transport Streams

Support of MPEG-TS program IDs

NDI

Native NDI output

NDI HX Support

NDI audio and video synchronized mechanism

NDI discovery mechanism

Capture multiple NDI sources

Time of day and embedded timecode options in NDI input

RTMP

RTMP recording with absolute timecode

RTMP Push Mode in input and output

RTMP Pull Mode in input and output

Native RTMP listener capability
Multiple audio channels in RTMP Output

SRT

Input modes: Caller, Listener, and Rendezvous

SRT listener mode as stream output

Output modes: Caller and Rendezvous

Stream ID support

Configurable latency settings

Configurable overhead bandwidth

Configurable passphrase

Monitoring input metrics

WebRTC

h.264 Support

VP8 Support

VP9 Support

Live switcher - Capture switcher producer

Commute between channels while recording

Record audio and video from one channel, or just audio or video

Playout from SDI Inputs

Playout from Streams Inputs

Playout from File Inputs

Overlay graphics support

Chroma Key as Input

File ingest

Multiple simultaneous transcodes

Batch ingest

Card ingest

Clip merge

Clip renaming

Disable Clip File Naming generation

Partial restore

Rough cut

Insert Subclips SOM and EOM without colons

Automatic drag and drop ingest

Drag and drop from social networks

Generate XML sidecar with WAV file as output while ingest

Generate a .xml file for each output AVID clip or AVID sequence

Merge as Sequence from MP4 proxy files

Automatically select workflows available in job control attending the source files

Allow the creation of clip cuts in growing files to be added to a playlist for playout

Directly select the storage on the dashboard instead of accessing workflow profiles

Copy assets

Group Assets - Group the resulting outputs into a single asset

Copy - Transfer sidecars if available

Encode the contents according to the destination format

Decode the contents according to the destination format

Move assets

Edit while ingest

Use locators on growing files

Multiple resolutions check-in

Frame rate conversion

Variable Frame Rate Input

High Dynamic Range (HDR) support - HLG (arib std-b67) / PQ (SMPTE 2084)

High Frame Rate (HFR) up to 120fps (ST2081-10, ST2081-11, ST2082-10, ST2082-11 and ST2082-30)

Ability to perform "Run after completion" scripts

Audio only OPAtom as output

Do not overwrite files option

Support for .MOV files containing "Run-length encoding" video essence

Enable "growing" support on EDL ingest workflow

Merge as EDL independent of input format

Merge Trimmed files

Merge files with different framerates

Merge P2 with different audio channels

Allow merge of more than 200 assets

Support for spanned Panasonic P2 structure

Preserve original time code breaks in Panasonic P2 Format

Mute proxy option in output (requires proxy option)

Edit decision lists with cut points

Display the total duration of sub-clips on Edit Decision List widget

Ingest from cloud locations

Digital Cinema Package (DCP) support

DCP Packager - Possibility to force fragmented MP4 while uploading to S3 buckets

Generation of MP4 files as fragmented MP4 with DCP packager

Digital Picture Exchange (DPX) support

IMF (Netflix Compliant) output metadata

FTP for generic network devices as input

Ability to delete OPAtom source files Support for GOPRO spanned files

Support video with vertical rotation

MOG file package support

Support MOG Package from Cloud Storages

Outgest growing media from Interplay

HDR (PQ, HLG) conversion to SDR as output

Support for image files ingest

Support 48fps drop frame media (DJI Camera Drones)

Support for spanned clips

XDCAM support for spanned & merge clips in network locations/network devices

Add black bars to respect aspect ratio

Delete Output on Job Abort

Schedule ingest (Calendar) - Automatic Job

Ingest and/or transcode the contents according to the destination format

Vubiquity assets support

Support for Vizzi collections as input files

Browse Avid Interplay folder structure from within the "Workflow selection window"

Avid Sub Clip export referencing Growing Master Clip

Generate Avid OPAtom assets to an FTP server

Update Metadata in Media Central/Interplay using AMT-3 library

Live Ingest Operations

Live sources available in asset browser/explorer

Override start timecode

Burn-In Video options

Graphic burn-in while recording

Graphic burn-in while ingesting

Text (Position, Text color, Box Color, Font Size)

Timecode (Position, Text color, Box Color, Font Size)

Overlays support (images and videos positioning)

LUT (Look-Up Table) - Save particular color grades as a template

Quality control - Report

Video Report

Black frames detection

Video freeze detection

Scene change detection

Audio Report

Audio clipping detection

Loudness detection

Silence detection

Others

Timecode gap detection

Automated ingest

Dynamic workflows using metadata fields

Dynamic workflows with support for metadata without sidecars

Delete Assets in Dynamic Jobs

Support different input types on dynamic configurations

Ignore files before a start date

Support metadata enhancement workflows

Vizzi Collections support

File playback

Simultaneous playback

Composition play

Instant play

Gang Play

Replay a group or an individual asset

Loop playback

Group Loop Playback

Gridline (3x5) Overlay

Remote preview

Support for 10bit

Synchronous SDI playback of multiple files

Closed captions

Cue mode

Monitor - support HDR

Option to add locators

Play assets from cloud storages

Playback - 8K UHD

Embedded VITC output support

Step multiple frames forward and backwards on SDI/gang playback

Timecode and metadata overlaying on SDI out

Support for growing assets in player

Support for spanned assets in player

Timecode only monitoring

Use of a contour shuttle to control an asset during playback

Playback duration showing the remaining time of the clip

Remove clips

Reorder clips

Export playlist

High Dynamic Range (HDR) support - HLG (arib std-b67) / PQ (SMPTE 2084)

High Frame Rate (HFR) up to 120fps (ST2081-10, ST2081-11, ST2082-10, ST2082-11 and ST2082-30)

Preview - Possibility to change the playback speed by multiplier factors

Simple Time Delay: Scheduling a Playback of a Single File in Growing Recording Mode

Read Metadata Timecode Package (Auto / Material Package / Source Package)

Playout

Playout Preparation

Build playlists in a Playlist Builder widget

Create multiple Playlists

Allow configuring playout clip action while preparing the playlist

Support visual separators for rPlayout playlists

Drag and Drop clips to the player for media preparation

Support insertion of Timecodes without separators ":" in the playlist builder

Use both types of TC (Relative and Absolute) for Mark-ins and mark-out at playlist builder

Trim clips to be included in the Playlist

Editable timecodes of the in and out points

Re-arrange clips order

Duplicate Edit Decision Lists

Export Edit Decision Lists

Playout Control

Edit playlist on the fly and while playing

Playlist countdown and clip countdown

File and clip list progress bars

Playout Capture streams through SDI and native window

Print to tape

Queue clip on the playlist

Queue on first frame and last frame

Queue on first frame the first clip of the playlist

Bypass action for playout clips

Pause Playlist

Playout to stream

Thumbnail preview of the current clip on the playlist and its remaining time until Playout of the next clip

Features

On Air - current loaded playlist name

Loop a playlist

Loop one or more assets in the playlist

Drag and Drop Clip List entries in Playout Control

Multi-channel playout capability

Schedule Playout

Choose between Playout Services available - rPlayerSDI or CasparCG

Mini control bar for use with Playout Control

Keyboard shortcuts for playout control and associated WEB player

As Run Log's containing Date, Time, Clip name, Time Code In, and Time Code Out

Prepare the Playout clip actions while preparing the playlist

Input/output social media *Optional

Google Chrome Social-m Plugin

Social-m - Add support for live stream capture

Metadata in Chrome Social-m Plugin

Capture to Facebook Live

Stream to Facebook Live

Stream to Twitch Live

Capture to YouTube Live

File based YouTube Upload

Capture X (Twitter) Live

Stream to X (Twitter) Live

Upload to Vimeo

Metadata social annotation and enhancement

PAM - Production Asset Management

Advanced text search

Asset browser permissions

Asset collections

Asset essences

Asset essences for generic sources

Asset comments

Enable on-the-fly tagging

Flexible metadata management

Dynamic Automatic Jobs - Age value for CreationDate (Available for Copy, Move, Archive Workflows)

Display of Essences File Paths

Check-in via detector

Check-in via metadata update

Check-in via workflow

Interactive approval workflows

MOG player proxy

Move option in asset collections

Collections as input in automatic jobs

Private and shared asset collections

Show the creator of the collection

Statistics for collections

Save searches and filters

Rich logging workflows

User abstraction for in/out assets

Instant play, anytime and anywhere of any asset (with or without proxy)

Metadata Enhancement and preservation

Artificial Intelligence

Audio

Audio clipping detection

Loudness detection

Silence detection

Voice activity detection

Audio mute detection

Audio phase detection

Mono audio detection

Video

Black frames detection

Video freeze detection

Scene change detection

Black Margins detection

Flashing video detection

Object

Concept tagger 2.0

Vehicle detection

License plate detection

Others

Timecode gap detection

Update existing interplay entry with new metadata

Possibility to add bounding boxes to player

Transform

Automatically Blur License Plates

Black margins automatic crop

Remove audio clicks

Remove audio clipping

Al Upscale

Reduce video flashing

Additional Al Operations

Face recognition 2.0

Face recognition - Support dataset with multiple images for each person

Age prediction detection

Object detection 2.0

Optical Character Recognition (OCR)

Speech recognition 2.0 (with ability to detect non speech tokens)

mTALK

Audio communication between users

QR code implementation

WebApp (requires Android smartphone)

Toggle Mode

Analytics

Google Analytics and Tag Manager integration

Option to enable and disable Analytics

Track menu events

Video metrics

Track job control widget events

Track asset explorer widget events

Improved security

Support for Windows UAC

Support for HTTP/HTTPS Ingress

HTTPS (Hypertext Transfer Protocol Secure) for REST API

Secure login

User Impersonation

Token based authentication

Two-factor authentication

Remote services, system restart, and settings recovery features

DASH/HLS packager with DRM

"Keep me signed in" login option

User Verification through email

Transfer acceleration protocols

Aspera FASP transport technology - Transfer acceleration protocol

FileCatalyst direct - Transfer acceleration protocol

Hardware acceleration *If Hardware is installed or available

Intel QSV

General Purpose IN/OUT

GPI triggers supported

GPO triggers supported

Additional Highlights

REST API - allows interaction with RESTful web services

Change Aspect Ratio (4:3 / 16:9 / 1.9:1 / 2:1 or use same as source)

Active Format Description (Option to Preserve, Discard or Override)

Notify user upon connection lost with the Server

Manage via web interface or REST APIs for integration with automation system

Control XPRESS display panel with peripheral API

Configurable quality and target latency of the preview stream

Logging - Human readable information on Services logs

Logging - Add user information on flow actions

Logging - Structured Logging

SMTP E-mail Notifications

Support an external Database

Microsoft Edge / Firefox and Chrome Support

Unified Interface User Experience

Web-Based Interface with video preview

Dashboards based experience where users can create their own personalized view

Dashboards presets for ease-of-use deployment

Create custom dashboard templates

Import and export of users Dashboards

Associate same dashboards to multiple users

LDAP user authentication

User profile management

Features
Users permissions control
Widget based modular interface
Lock/Unlock widgets permission
High contrast theme
Touch screen mode
Monitoring - Advanced metrics
Multi Language Support
User tour
Show/Hide player overlays
Notifications of required actions needed to resume a workflow
View which servers in a group are running Capture and Ingest Operations in a Group activity widget
Possibility to remove quick edit button from Job Control widget
Permissions to activate or deactivate settings of Gang Capture widget
Multiviewer
Configurable quality and target latency of the preview stream
Ability to control to up to 4 players in a single dashboard
Maintenance
Scheduler
Reboot host or group
Export database (backup) as a scheduled task
Export logs as a scheduled task
Activity
Export last activity
Export all activity
Export activity from a date range
Clear all activity
Logs
Export logs
Backup
Export full backup - A full backup will create an archive of all the files and configurations
Import full backup
Dashboards
Export dashboards from one user or all users
Import dashboards
Data
Clean data usage
Clean assets, flows and notifications
Factory data reset
Erase all data and reset the system

	Breakout Cable	GPO branch with 4 outputs	2
		GPI branch with 4 inputs	2
	Dimensions & Weight		2RU, 245x484x89mm (D, W, H), ~14Kg
	Delivery Packaging		580x380x250mm (D, W, H), ~15Kg
Other	Tomporatura	Storage**	-40°C to 65°C (-40°F to 149°F)
<u></u>	Temperature	Continuous Operation	10°C to 32°C (50°F to 89.6°F)
	What is Included	Power Cable	2x C13 to C14
		Other	4x rack mount screws

^{**} Not included by default

Concurrent Media Operations

With mDECK Densu io, it is possible to run different media operations simultaneously, thus guaranteeing a universe of distinct arrangements to meet the challenging day-to-day activities of media production companies.

Media operations include recording, ingest, transcoding, playback, file preview, live channel switching, and intercom.

mDECK Densu io supports up to 4 media operations per node at the same time. Within this margin, you can combine the operations shown in the table below:

Concurrent Media Operations					
Record	Ingest & Transcode	Playback	File Preview	Live Switch	Intercom
Up to 2 live channels per node	Up to 1 operation	Up to 2 playback files per node	Up to 5 files preview	Up to 1 operation	Up to 1 operation

Product

Part Number	Product	Description
mddnio	mDECK Densu io	Compact dual-node deck appliance for hybrid workflows of up to 5 combined media operations per node

Available Options

Choose from the products below to customize the mDECK Densu io according to your business rules.

Production Tools

Tools for asset management and workflow orchestration.

mPLAN

Setup scheduled events not only from the standard scheduler but through a unique roll out view interface. mPLAN is a tool that maintains a single rollout view of all scheduled events, allowing the management of the ingests process very efficiently. It manages multiple scheduled events across a variety of recording platforms in a multichannel environment using router control cross-points.

Part Number	Product	Description	
mpla1c	mPLAN	Scheduler & Router Control of up to 8 channels	

Note: Adding optional features might affect the number of simultaneous operations.

Add-ons

Output options to complement your workflows.

Part Number	Product	Description
s2oasa	OTT & Social media	Multiple output resolutions for OTT & Simultaneous social media shares
s2ioiplk	IP live kit	IP media production infrastructure

Note: Adding optional features might affect the number of simultaneous operations.

Plugins

Complement any media production and distribution workflow with turnkey plugins and extensions.

Social-m

Quickly fetch and publish your live or VoD contents to social media.

This social media plugin for Chrome will let users ingest media without having to access the mDECK GUI, allowing the content to be ready for editing or any other task, in no time. Simply open the plugin, insert the URL and run the workflow to fetch your video, with option to preserve metadata.

Screen-m

Quickly capture and deliver your screen contents to your production environment.

Easily record your screen in its entirety or choose one of the open windows. You can even enable the capture of a microphone and the mouse cursor to make it easier to explain any presentation.

Part Number	Product	Description
smpi	Social-m plugin	Social media capture & Publishing
scpi	Screen-m plugin	Screen capture & Delivery

Note: Adding optional features might affect the number of simultaneous operations.

Artificial Intelligence

Artificial intelligence engine to boost and facilitate media tasks even more.

Default (already included)			
Black frames detection	Voice activity detection		
Video freeze detection	Silence detection		
Black margins detection	Loudness detection		
Audio clipping detection	Loudness balance		
Audio mute detection	Vehicle detection		
Audio phase detection	License plate detection		
Audio mono detection	Concept tagger		
Timecode gap detection	Bouncing boxes		
Scene change detection	Update existing interplay entry with new metadata		
	Transformation		
Frame rate conversion	Crop black margins		
Remove audio clicks	Al upscale		
Remove audio clipping	Blur license plates		

Additional Al Operations			
Part Number	Product		
s2aifr	Face Recognition and Age Prediction		
s2aiod	Object Detection		
s2aicr	Optical Character Recognition		
s2aisr	Speech Recognition		

Note: Adding optional features might affect the number of simultaneous operations.

Storage

Option for local storage.

Part Number	Description
r2ssd6x1	6TB of SSD storage
r2ssd6x2	12TB of SSD storage
